

- 6 -

facility serves only 6.5% of the area to be served by the KCVI Construction Permit. Station KRSS' upgrade Class C2 facility will serve only 32.6% of the area which will be served by the KCVI Construction Permit. The same facilities serve only 39.1% and 48.1% of the population respectively as will be served by the KCVI Construction Permit.

Exhibit J shows the competitive situation in the market place served by the Bott Station KCIV licensed to Mt. Bullion. The 60 dBu coverage area of this Bott station is completely duplicated by another religious programed FM station, KFER. Station KFER's transmitter site is located within .517 km. of the Bott Station KCIV's transmitter site. Another competitive station to the Bott Station KCIV is Station KFNO, a Class B FM station licensed to Fresno, CA. The 60 dBu contour of Station KFNO overlaps the 60 dBu contour of the Bott Station KCIV by 20.6%.

Beside these three FM stations, this market is served by four (4) additional AM stations, KBIF, KIRV, KEYO, and KRDU, all of which are also religious programed stations. This completely divides the market served by Bott's Station KCIV so that his proportioned share of the population is only 59,986 persons.

The population proportioned to Bott's proposed Station KCVI in Blackfoot is 169,595. This is 2.83 times more persons than is proportioned to the Bott Station KCIV at Mt. Bullion. See Exhibit J Table C, the contour comparison coverage map page 2, and the overlap population tabulation, Table D, within the Mt. Bullion market of the Bott KCIV facility.

- 7 -

CONCLUSION.

Exhibit I Table B is a summary of facts derived from this study, which demonstrate that the area and population that will be served by the KCVI Construction Permit Class C facility is much superior to the area and population that is or will be served by Station KRSS either as a Class A or a Class C facility. The KCVI Construction Permit will serve an additional 135,888 persons within 53 towns and communities not served by Station KRSS even with the KRSS upgrade to a Class C2 facility. It shows that of the three major cities within the state of Idaho (those cities having more than 30,000 persons), two of these cities will be served by the KCVI Construction Permit, and only one will be served by Station KRSS even with its upgrade. The population to be served by the KCVI Construction Permit will be 207.09% more than that to be served by Station KRSS with its Class C2 upgrade, and is 255.51% greater than Station KRSS' present licensed facility on Channel 252A. The area to be served by the KCVI Construction Permit will be 306.90% greater than the area to be served by Station KRSS providing its facility is constructed and put on the air according to the Commission's authorization. The area to be served by the KCVI Construction Permit will be 1518.97% greater than the area currently served by Station KRSS; i.e. the area to be served by the KCVI Construction Permit within the 60 dBu contour will be 15.19 times greater than the area within the 60 dBu contour of the present licensed operation of Station KRSS.

- 8 -

Client RRI/BOTTDate 11/19/92

FCC form \_\_\_\_\_ Sec. \_\_\_\_\_ Pg. \_\_\_\_\_

In no way could it be considered that Station KRSS, either as a licensed Class A facility or as a Class C2 constructed facility, could be a competitive facility to such an extent to be devastating to the operation of the authorized KCVI facility. Station KRSS' facility is so limited compared to the KCVI Construction Permit facility, that even KRSS would not be competitive.

I do hereby certify that I have prepared the enclosed data and, under penalty of perjury, that data of my own knowledge is correct. As to other information and belief, I believe that information to be true.
